DATTO SIRIS BUSINESS CONTINUITY

What Does Continuity Mean For Your Business?

Imagine you are a medical practice that can't book appointments because your server is down. How long could this business be down before it starts to "hurt" patients? Imagine you are a law firm that needs specific case files, but whose files were recently "locked up" by the Cryptolocker virus. Imagine you are a retail business that needs to process hundreds of transactions a day, but your point of sale system was damaged in an electrical storm, and you can't process and record transactions. How will you stay in business? What will you do?

Now imagine getting it all back in a matter of seconds. Your business is running, and you're back to making business decisions.

It's no longer a matter of "if," but "when" a real world threat will compromise your business data. Between natural disasters, viruses, user error, and ransomware like "cryptolocker," these threats are becoming ever-present.

Business continuity made for your business

No matter how complex your IT environment may be, business continuity should be simple, fast, and fail-safe. It should work when you need it to – in an instant's notice – locally in your office or from an off-site location. It should prove itself day in and day out on your schedule.

Datto SIRIS is a robust business continuity solution that brings together state of the art hardware with a secure cloud storage capability.

The result is a comprehensive backup, recovery, and business continuity solution that gets your business up and running instantly in the event you can't access your data or systems.

With a SIRIS You Get Total Data Protection

There is a misconception that Microsoft provides sufficient backup, but this is not the case. Let's take a look at why relying on Microsoft to keep your business data safe puts you at risk and how data loss can occur:

SIRIS combines the most important elements of data protection into a single fully integrated package: backup capture and verification, backup restore, and a complete virtual host for business continuity.

- **Recover critical data quickly.** Should you experience a server failure, the SIRIS can have your Windows or Linux environment and data recreated in minutes from the local device or the Datto Cloud, and have your Mac files and folders recovered just as quickly.

- **Proof that your backup was successful.** Visual proof in the form of a screenshot and service verification gives you peace of mind that your data has been successfully backed up.

- **Compare backup points.** Now you never need to guess when data was deleted, added, or modified. You can know what changed and when – in a matter of minutes.

What do you get with our solution?

Data Protection on Premises and in the Datto Cloud. Every image-based snapshot of your system is stored both locally and in secure, purpose-built data centers using Datto technology. This means no third-party cloud providers are involved in the safety of your data.

Built for Quality. All Datto business continuity products are designed and assembled in Datto's build facilities by a highly trained team using the best components on the market. Each device is assembled to our exacting standards with extreme attention to detail.

An Award-Winning Industry Leader. Award-winning technology and innovative new solutions from a team that prides itself on building a better business continuity solution day in and day out. Datto has been recognised for its ingenuity by The Atlantic, Forbes, Fast Company, Bloomberg Business, and The New York Times.

Don't run the risk of not being able to recover your data and not being able to function. To see how easy it is to protect and recover your data, get in touch with our experts today!

OTHER SERVICES

THE BLUEGRASS DIFFERENCE

Your IT infrastructure underpins your business success. It needs to support your day to day operations and facilitate your future growth.

By choosing this service with Bluegrass Group, you'll benefit from partnering with a Managed Services Provider who's small enough to care, but big enough to cope.

Established in 2007 and serving clients across the UK, you can rest assured knowing you're in safe hands. We'll proactively support, protect and enhance your IT systems 24/7/365 days a year to allow you to get on with what you do best.

Unlike some larger providers, you'll always receive a personalised service with dedicated contact every step of the way.

Customer service excellence is our number one priority and our entire team are here to make your life easier. From Relationship Management that truly listens to your individual business needs, pain points and goals, to Engineers who consistently receive an average score of 5 out of 5 for support.

You'll be able to take advantage of having access to highly skilled technical experts who can provide you with ongoing advice, systems design and implementation

By moving your services to Bluegrass Group, you'll also enjoy a seamless integration experience with a dedicated point of contact, plus on-going benefits such as one invoice, one phone number and complete compatibility across all of the services you take from us.

We are dedicated to enabling our employees to inspire businesses to get the most out of technology so that, together, we can help you achieve success.
