

DATTO MANAGED SWITCHES

Datto Managed Networking Switches

For many of your small businesses, top end switches are overkill. They are expensive and usually include an accumulation of features that your business will never use, making them unnecessarily complex.

Datto Networking Switches were built to deliver the right set of features for your business, with a focus on intuitive deployment and simple management. Gone are the days of overly complicated features buried in a maze of minutia.

Our switches have full layer 2 management features that complement the services needed by businesses such as VoIP, or business continuity.

Cloud Based Management

Our managed switching starts with a cloud-based management portal where we can install, configure and manage all of your networking devices.

With Datto Networking, we can manage any number of devices and multiple networks from the same Portal.

This matters because many switch vendors don't offer any cloud management, meaning management solutions have to be cobbled together just to manage their switches. With Datto Networking Switches, it's simple cloud-based networking accessed from one place.

Plug it in install

We know that it costs you money when network switches fail and your IT provider has to visit your office. The longer it takes them to arrive and resolve the problem the more it costs you.

That's why Datto Networking with its "Just-Plug-It-In" Installation is perfect for small businesses. It's really that simple. Plug the Switch in and it will self-organise with all of the other Datto Networking devices on the network including Datto access points. And it will automatically connect to Datto's cloud management Portal.

On top of that, to set up all of your configuration options these are done once, saved, and then applied to every new installation. Configurations are stored in the cloud, so no additional backups are required of the switch settings. "Just-Plug-It-In" and it works.

Device size options and features

To cater for varying business needs our Datto switches come in 10, 24 and 48 port options, all providing Layer 2 management.

They can be mounted on the desktop, wall mounted or rack mounted (included).

No onsite management appliance required, automatic firmware upgrades, automatic future-proofing via new and upgraded features.

QoS provided for VoIP phone systems.

Warranty & Support

At Bluegrass, we believe in the value of great products and an unwavering commitment to 24x7x365 customer service and support.

Every Datto Networking product ships with a lifetime warranty, backed by their advanced replacement program. If you have an issue with your device, Datto will ship a new one before sending the damaged device back. That way you are always connected.

THE BLUEGRASS DIFFERENCE

Your IT infrastructure underpins your business success. It needs to support your day to day operations and facilitate your future growth.

By choosing this service with Bluegrass Group, you'll benefit from partnering with a Managed Services Provider who's small enough to care, but big enough to cope.

Established in 2007 and serving clients across the UK, you can rest assured knowing you're in safe hands. We'll proactively support, protect and enhance your IT systems 24/7/365 days a year to allow you to get on with what you do best.

Unlike some larger providers, you'll always receive a personalised service with dedicated contact every step of the way.

Customer service excellence is our number one priority and our entire team are here to make your life easier. From Relationship Management that truly listens to your individual business needs, pain points and goals, to Engineers who consistently receive an average score of 5 out of 5 for support.

You'll be able to take advantage of having access to highly skilled technical experts who can provide you with ongoing advice, systems design and implementation

By moving your services to Bluegrass Group, you'll also enjoy a seamless integration experience with a dedicated point of contact, plus on-going benefits such as one invoice, one phone number and complete compatibility across all of the services you take from us.

We are dedicated to enabling our employees to inspire businesses to get the most out of technology so that, together, we can help you achieve success.
