

SOPHOS INTERCEPT X

Advanced Data Protection

Sophos Intercept X employs a comprehensive defense-in-depth approach to endpoint protection, rather than simply relying on one primary security technique.

Modern techniques include deep learning malware detection, exploit prevention, and anti-ransomware specific features. Foundational techniques include signature-based malware detection, behavior analysis, malicious traffic detection, device control, application control, web filtering, data loss prevention, and more.

Deep learning Malware detection

The artificial intelligence built into Intercept X is a deep learning neural network, an advanced form of machine learning that detects both known and unknown malware without relying on signatures.

Powered by deep learning, Intercept X has the industry's best malware detection engine, as validated by third party testing authorities. This allows Intercept X to detect malware that slips by other endpoint security tools.

Stop the exploit, stop the attack

Vulnerabilities show up at an alarming rate in software and need to be constantly patched by vendors.

New exploit techniques on the other hand are much rarer, and are used over and over again by attackers with each vulnerability discovered.

Exploit prevention denies attackers by blocking the exploit tools and techniques used to distribute malware, steal credentials, and escape detection. This allows Sophos to ward off evasive hackers and zero-day attacks in your network.

Proven Ransomware Detection

Intercept X utilizes behavioral analysis to stop never-beforeseen ransomware and boot-record attacks, making it the most advanced anti-ransomware technology available.

Even if trusted files or processes are abused or hijacked, CryptoGuard will stop and revert them without any interaction from users or IT support personnel.

CryptoGuard works silently at the file system level, keeping track of remote computers and local processes that attempt to modify your documents and other files.

Simplify management and deployment

Managing your security from Sophos Central means you no longer have to install or deploy servers to secure your endpoints. Sophos Central provides default policies and recommended configurations to ensure that you get the most effective protection from day one.

OTHER SERVICES

Microsoft Office 365

Comprehensive Cloud based solution of Microsoft Word, Excel, Outlook, PowerPoint, SharePoint, OneDrive and Teams.

Email Security

Defends end users against various strains of malware, weaponised attachments and phishing emails that evade traditional detection.

Email Encryption

Specialised security software technology for protecting the confidentiality and integrity of email messages and attachments.

SafeSend Email Protection

An Outlook add-in used to prevent misaddressed email or inadvertent autocomplete email mistakes.

Security Awareness Training

Security awareness program for your staff to help reduce your company's vulnerability to Phishing email scams.

Office 365 Data Protection

Cloud backup, restore and export solution that covers Exchange Online, OneDrive SharePoint Online, and Microsoft Teams

Antivirus

A comprehensive defense-in-depth approach to endpoint protection with the industry's best malware detection engine.

Device Disk Encryption

Full disk encryption of your devices to safeguard important and sensitive data. An essential first line of defence.

Dark Web Trace

Software that can detect if your company is at risk due to stolen and exposed credentials for sale on the Dark Web.

VoIP Phone System

A flexible phone system that can cater for businesses of any size, irrespective of whether you have a single site or many offices.

Internet Connectivity

Business broadband, fibre, leased lines and for those hard to connect areas, satellite broadband.

THE BLUEGRASS DIFFERENCE

Your IT infrastructure underpins your business success. It needs to support your day to day operations and facilitate your future growth.

By choosing this service with Bluegrass Group, you'll benefit from partnering with a Managed Services Provider who's small enough to care, but big enough to cope.

Established in 2007 and serving clients across the UK, you can rest assured knowing you're in safe hands. We'll proactively support, protect and enhance your IT systems 24/7/365 days a year to allow you to get on with what you do best.

Unlike some larger providers, you'll always receive a personalised service with dedicated contact every step of the way.

Customer service excellence is our number one priority and our entire team are here to make your life easier. From Relationship Management that truly listens to your individual business needs, pain points and goals, to Engineers who consistently receive an average score of 5 out of 5 for support.

You'll be able to take advantage of having access to highly skilled technical experts who can provide you with ongoing advice, systems design and implementation

By moving your services to Bluegrass Group, you'll also enjoy a seamless integration experience with a dedicated point of contact, plus on-going benefits such as one invoice, one phone number and complete compatibility across all of the services you take from us.

We are dedicated to enabling our employees to inspire businesses to get the most out of technology so that, together, we can help you achieve success.
