

VIPRE SAFE SEND EMAIL PROTECTION

SafeSend solves the problem of misaddressed emails

Have you ever mistakenly sent an email to the wrong person? Perhaps you glanced up at an autocomplete email address, saw that it looked correct, and hit send ... only to realise it was the wrong "Mike"? Most of us have done this at least once and that sinking feeling can be uncomfortable and embarrassing. For public organisations and businesses that must adhere to strict compliance and regulatory requirements such as solicitors, accountants, financial services, care homes, and healthcare, the results can have a severe financial impact.

VIPRE's native email encryption

Use SafeSend to confirm external recipients and attachments in Microsoft Outlook when sending outgoing emails.

VIPRE SafeSend is an Outlook add-in used to prevent misaddressed email or inadvertent autocomplete email mistakes by requiring the user to confirm external recipients and file attachments before an email can be sent.

- Confirm external recipients and attachments in outgoing emails. Proactively prevents data leakage due to autocomplete.
- Create a white-label customised version with your corporate logo and style.
- Use a user interface adjusted for your audience.
- All settings in SafeSend are configurable using Windows Group Policy and can be specified on a per-group basis.
- Deploy SafeSend to tens of thousands of users using SCCM or any other deployment tool. There is no limitation in terms of user count.
- Add DLP functionality (optional) to automatically scan outgoing emails and attachments to ensure sensitive data does not leave your network.

Email recipients

Improve GDPR compliance and ensure your confidential data is not being shared inappropriately via email.

Often the contents of emails and attachments can be highly confidential, containing proprietary data, financial information, personally identifying information (PII) and other data that could lead to violations of SOX, and/or GDPR regulations to name only a few.

Prevent Spear Phishing

An external sender pretending to be the Managing Director with a spoofed email address will get caught. Replying to a spear phishing email will display the SafeSend confirmation window.

Improve awareness

Corporate branding and the ability to include custom text with a link to your email/security policy, your users will be reminded that your organisation cares deeply about security.

GDPR compliant

The preventative function of SafeSend aligns with GDPR Article 32 "to implement appropriate technical and organisational measures together with a process for regularly testing, assessing and evaluating the effectiveness of those measures to ensure the security of processing".

Trigger options

SafeSend can be triggered under different conditions. The most common option is to display SafeSend for all external emails being sent outside the company. The second most common option is to display it only when files are sent externally.

SafeSend can also be configured to be triggered only when there is a DLP match in an external email.

Optional DLP module

SafeSend with Data Loss Protection (DLP) further scans attachments and email content for particularly sensitive data and allows companies to build additional custom DLP rules. Using regular expressions you can detect sensitive keywords or data patterns inside the email body or attachments such as credit card numbers, bank account details or national insurance numbers.

OTHER SERVICES

Microsoft Office 365

Comprehensive Cloud based solution of Microsoft Word, Excel, Outlook, PowerPoint, SharePoint, OneDrive and Teams.

Email Security

Defends end users against various strains of malware, weaponised attachments and phishing emails that evade traditional detection.

Email Encryption

Specialised security software technology for protecting the confidentiality and integrity of email messages and attachments.

Business broadband, fibre, leased lines and for those hard to connect areas, satellite broadband.

THE BLUEGRASS DIFFERENCE

Your IT infrastructure underpins your business success. It needs to support your day to day operations and facilitate your future growth.

By choosing this service with Bluegrass Group, you'll benefit from partnering with a Managed Services Provider who's small enough to care, but big enough to cope.

Established in 2007 and serving clients across the UK, you can rest assured knowing you're in safe hands. We'll proactively support, protect and enhance your IT systems 24/7/365 days a year to allow you to get on with what you do best.

Unlike some larger providers, you'll always receive a personalised service with dedicated contact every step of the way.

Customer service excellence is our number one priority and our entire team are here to make your life easier. From Relationship Management that truly listens to your individual business needs, pain points and goals, to Engineers who consistently receive an average score of 5 out of 5 for support.

You'll be able to take advantage of having access to highly skilled technical experts who can provide you with ongoing advice, systems design and implementation

By moving your services to Bluegrass Group, you'll also enjoy a seamless integration experience with a dedicated point of contact, plus on-going benefits such as one invoice, one phone number and complete compatibility across all of the services you take from us.

We are dedicated to enabling our employees to inspire businesses to get the most out of technology so that, together, we can help you achieve success.
